

## 2017 COUNTRY OF FOCUS UPDATE: HAITI

In response to the crisis which exists for Haitian children with heart disease, in 2015 Gift of Life International formed a partnership with St. Damien Hospital. GOL I Haitian affiliate Kado Lavi helps to oversee the program.

The first-ever Haitian pediatric cardiologist is being trained in Martinique and will return to St. Damien Hospital upon completion of her training.

Gift of Life International will continue our efforts to treat these children in need by coordinating multiple screening and surgical missions each year in collaboration with our partners. We will also work to upgrade essential equipment to help ensure optimal treatment and positive outcomes for each child.
