

2017 CORE PROGRAM UPDATE – JAMAICA

Gift of Life International has partnered with Chain of Hope UK in Jamaica since 2011. Within the coming year, this program will reach a point of sustainability and will be overseen by Chain of Hope Jamaica as Jamaican hearts continue to be healed.

The new pediatric cardiac unit at Bustamante Hospital for Children (BHC) will open in the coming months, allowing for Jamaican children with heart disease to be treated in their country of birth. This facility was built and equipped in a collaborative effort between like-minded partners, Rotary partners, BHC administration and the Jamaican government.

The Jamaican pediatric cardiac team has received intensive, targeted training over the past six years, empowering them to treat these children in their new facility with the acquired skills.
