Gift of Life International provides gratis treatment to children with heart disease and is tax exempt according to IRS Code 501c3. Tax ID#56-2322626
VISION STATEMENT

We transform the lives of children with heart disease and their families by coordinating the collaboration of autonomous Gift of Life programs with like-minded partner charities, hospitals, healthcare professionals, Rotarians and other volunteers to develop sustainable pediatric cardiac surgery, catheterization and aftercare programs in emerging countries. We believe by establishing Regional Centers of Excellence in East Africa, Central America, the Caribbean and elsewhere we will save lives and allow communities to care for their own children with heart disease. We will integrate all elements of proper healthcare for these children, with special attention to nutrition and humanized care training of healthcare professionals and parents. We will conduct ourselves with respect for the role of local governments, medical teams and hospital administrators.

Our Legacy ......................................................... 38
Dear Stakeholder:

Our impact this past year of providing hope to children who have heart disease from emerging countries has exceeded our goals. The global network we have developed reached over 1,000 children from five continents and 71 countries.

Included in this success are the children whose lives were saved as part of our groundbreaking global initiative: “The 7-in-7 Campaign.” Remarkably, with the help of many global partners, seven children representing seven continents received lifesaving cardiac treatment in just seven days. An eighth World Peace Child was also included in this global initiative. Without you, these successes would not have been possible!

The support we received from generous and caring people such as you allowed for children from countries as diverse as East Timor and Zambia to receive the care they so desperately needed. Our network of caring individuals, like-minded partners, healthcare professionals and institutions partnered to continue developing sustainable pediatric cardiac surgery, catheterization and aftercare programs in Uganda, El Salvador and Jamaica. Thanks to these combined efforts, more than 2,200 children have now been treated in these three countries since 2009.

Our global network continues to bring hope to children with heart disease by conducting medical missions in Kosovo, the Philippines, Haiti and the Dominican Republic. We are proud to partner with some of the most respected medical professionals and institutions in the world. In part, the support you provide Gift of Life International enables these world-renowned training teams to transfer their skills to doctors and nurses throughout the world, which empowers them to do what they are trained to do: save their children’s lives!

As you review this 2015 Stakeholder Report, please know that you were an essential part of our efforts to provide hope to children in need with heart disease as well as their families who so desperately fight for their children’s lives. With congenital heart disease ranked as the No. 1 birth defect worldwide, there is a crisis throughout the world, which you are helping to address. Worldwide, 5.5 million children are born each year with a congenital heart defect, and 94 percent of them are born in a country that cannot provide them the care they require.

Thank you for being a generous and loving person by helping to give these children and their families the hope they would otherwise not be afforded. Thank you for placing your trust in us as we heal little hearts throughout the world!

Sincerely,

Suzanne Freaney
President

Our 74 Gift of Life (GOL) Programs span 5 continents and 71 countries
DURING THE PAST 4 DECADES, ACROSS 71 COUNTRIES, MORE THAN 18,000 CHILDREN WITH HEART DISEASE AND THEIR FAMILIES HAVE BEEN GIVEN **HOPE** THROUGH THE GIFT OF LIFE NETWORK OF CARING...

Parents who despaired that they would not be able to find treatment for their child have been provided hope through the network of hundreds of volunteer Rotarians and healthcare professionals, like-minded charities and autonomous Gift of Life programs. Children born in countries where critical cardiac care was not available now have hope that they will be treated in a timely manner.

"I want to thank you. I know God has given us the Gift of Life but he has given you the means to give all children out there the Gift of Life. We are so grateful for all you have done for us. Before, Joshua could not do anything. Now he plays. Now he can walk to school. I am sure that he is going to have a great future thanks to you. We love you, Gift of Life!

Mother of GOL recipient, Joshua Zambia

Providing **HOPE** to children with heart disease and their families
LEVERAGING THE COLLECTIVE STRENGTH OF OUR GLOBAL NETWORK TO

EMPOWER DOCTORS AND NURSES...

Gift of Life International’s Core Programs have been developed to provide local pediatric cardiac teams the training, resources and equipment necessary to ensure reliable and sustainable treatment for their children.

Our Core Programs exist in countries where governments and hospital administrations have prioritized support of their pediatric cardiac programs and the doctors and nurses of those programs.

“...It is always a pleasure to work and learn from the visiting professionals Gift of Life International sponsors. The work ethic of these visiting doctors and nurses is admirable and inspiring. I learn something new each time. I believe my interaction with the teams has made me confident in my nursing skills and better at my job.”

Sarah Namatovu
ICU Nurse
Uganda Heart Institute

EMPOWERMENT EQUALS HOPE

Dr. Martinez and his team have provided reliable care for Salvadoran children with lower complexity heart disease. Now he and his team are empowered to provide care to children with more complex cardiac conditions, who today have hope to receive treatment in their own country.

The success of the Salvadoran program is a direct result of the mentoring received from world-class pediatric cardiac training teams who have returned to El Salvador over the past six years.

Thanks to the joint efforts of Gift of Life International and Chain of Hope UK, Denese was provided the training necessary to become a perfusionist on the pediatric cardiac team at Bustamante Hospital for Children (BHC). Denese is empowered to play a central role in all open-heart surgeries performed at BHC.

Denese has a child with congenital heart disease and it was always her dream to help other children in need of cardiac treatment. Each day, she fulfills her dream of giving back to her community and helping Jamaican children with heart disease.
WE ARE PROUD OF OUR NETWORK OF
HEALTHCARE PARTNERS

WHO GENEROUSLY TRANSFER THEIR SKILLS AND PROVIDE THE BEST
POSSIBLE CARE TO THE CHILDREN THEY TREAT DURING TRAINING VISITS

Gift of Life International is fortunate to work with some of the most highly respected healthcare professionals from world-renowned institutions throughout our global network.

"Over the last five years, I have had the privilege to work with Gift of Life International (GOLI) through their efforts to improve healthcare for children with congenital heart defects in El Salvador. It has been an honor to not only participate firsthand in the care for these children, but as importantly, to participate in the development of a sustainable pediatric cardiac program at Hospital Bloom. This opportunity would cease to exist if not for the vision, compassion and commitment of Gift of Life International to this program. I have already witnessed amazing improvements and accomplishments over the years and hope to continue working with GOLI to further solidify a strong pediatric heart program in El Salvador."

Dr. Gabe Owens
Pediatric Cardiologist
C.S. Mott Children’s Hospital, University of Michigan

"I have been partnering with GOLI in El Salvador for over four years and have appreciated the opportunity to collaborate with the local nurses and physicians as they have worked tirelessly to grow their program. Leading a team of expert nurses, physicians, surgeons and perfusionists from Boston Children’s Hospital over the last few years has allowed us to cultivate relationships with the team and tailor our educational approach over several visits. Our collective goal has been to build a sustainable and ultimately independent program. Working with GOLI and the Hospital Bloom team has been very rewarding as they have worked to take care of more patients each year, delivering desperately needed care to their local patients and families. We look forward to our continued partnership and thank GOLI for their support of this important work."

Jason Thornton, RN, MSN, CPN, NE-BC
Director of Nursing/Patient Services, CICU & CVOR

CREATING SUSTAINABLE PEDIATRIC CARDIAC PROGRAMS REQUIRES THE ENHANCEMENT OF SKILLS AND THE ACQUISITION OF FUNDING FROM LOCAL GOVERNMENTS, BUSINESSES AND INDIVIDUALS...

TO ALLOW DOCTORS AND NURSES TO DO WHAT THEY WERE TRAINED TO DO: SAVE THEIR KIDS!

Sustainability is essential to ensure that children with heart disease will be reliably cared for in their country of birth. Doctors and nurses require training so they develop the skills necessary to provide optimal care for their children. Local governments must lead the way to financially support these healthcare professionals with appropriate salaries and the requisite supplies, medications and equipment.

IN 2009, GOLI CREATED A STRATEGY TO FOCUS ON DEVELOPING SUSTAINABLE PEDIATRIC CARDIAC SURGERY, AFTERCARE AND CATHETERIZATION PROGRAMS IN SELECT COUNTRIES.

THE FOLLOWING CRITERIA WAS ESTABLISHED FOR THE SELECTION OF OUR CORE PROGRAMS

- Supportive and invested government
- Motivated and involved hospital administration
- Established pediatric cardiac surgery program
- Existing in-country, non-governmental organization to support the program
Our Impact in UGANDA

Since 2009, Gift of Life International has been collaborating with its like-minded global partners in the development of a sustainable pediatric cardiac surgery, aftercare and catheterization program at the Uganda Heart Institute.

Tremendous progress has been made over the past seven years with the following results:

- **615 Children Treated**
- **$2.51 Million Invested**
- **19 Training Visits Conducted**

Ugandan healthcare professionals have been empowered to care for children with heart disease in their own country. The impact of ongoing training provided by world-renowned pediatric cardiac teams is apparent in these results. More than 100 Ugandan children with heart disease are now treated by Ugandan doctors and nurses each year.
Our Impact in EL SALVADOR

Over the past six years, the lives of more than 1,000 children and their families have been transformed after receiving lifesaving cardiac treatment, which was not readily available prior to 2010.

Gift of Life International and Salvadoran affiliate Latidos de Esperanza have partnered with world-class medical teams and like-minded global partners to develop a sustainable pediatric cardiac surgery, catheterization and aftercare program for the children of El Salvador.

1,032 Children Treated

$2.57 Million Invested

21 Training Visits Conducted

Complexity of cases successfully operated and recovered by the local Salvadoran team has increased dramatically as a result of the mentoring received over the past six years. Children who previously had no hope for treatment are now receiving optimal care from their own healthcare professionals.
Our Impact in JAMAICA

Since 2011, Gift of Life International has partnered with like-minded global partner Chain of Hope to develop a sustainable pediatric cardiac surgery, aftercare and catheterization program at Bustamante Hospital for Children in Kingston, Jamaica.

Construction of a new, state-of-the-art cardiac unit, including a cath lab, is expected to reach completion by the end of this year.

552 Children Treated

$2.22 Million Invested

15 Training Visits Conducted

The new pediatric cardiac facility, along with ongoing skills transfer by world-class medical professionals has empowered Jamaican healthcare professionals to provide lifesaving cardiac treatment to children with heart disease in Jamaica and surrounding Caribbean Islands.

Through the support of our Global Network of like-minded partners, Gift of Life programs, Healthcare Partners and the Syosset High School Interact Club, Gift of Life International was able to impact the lives of seven children with heart disease from seven continents in just seven days. Additionally, an eighth World Peace Child received an operation.
Gift of Life International has been healing little hearts in Haiti since 2012. In collaboration with our global partners and many GOL programs, Haitian children with heart disease who previously had no hope are now being treated.

The first-ever pediatric cardiac program in Haiti is being established at St. Damien Hospital, where an operating theater and ICU have been set up specifically to treat these children.

As a result of screening missions, a national cardiac waiting list has been developed, providing hope to children who had never before been diagnosed.

Gift of Life International receives more requests for help from Filipino parents of children with heart disease than from any other country around the world. In an effort to provide cardiac treatment to as many of these children as possible, GOLI has coordinated four medical missions over the past two years and has planned three more missions within the next 12 months.

Expert medical teams from Duke University Medical Center and other leading U.S. pediatric cardiac programs provide mentoring to the Filipino doctors and nurses. Funding to support medical missions is provided primarily through Rotary International grants, which are supported by Rotary Clubs and Districts and various GOL programs.

Rotary Grant Investment
Children with heart disease in Kosovo have little hope of receiving treatment, since there is currently no pediatric cardiac care available. In 2012, Gift of Life International conducted its first-ever screening mission to Pristina. Children were diagnosed and prioritized for treatment at our partner hospitals around the world. A second screening mission was completed in 2014, further populating the long waiting list of children in need of cardiac treatment.

In an effort to address the immense need for cardiac care, Gift of Life International is collaborating with like-minded partner Chain of Hope to conduct regular medical missions to Pristina, providing hope to children with heart disease and their families.

NO SINGLE ORGANIZATION CAN DEVELOP A PEDIATRIC CARDIAC PROGRAM ON ITS OWN.
IT TAKES A GLOBAL NETWORK TO ENSURE SUCCESS...

Gift of Life International is honored and proud to work side by side with a number of the most highly respected charities focused on saving the lives of children with heart disease. Our ability to access the talents and resources of an international humanitarian community allows us to make the greatest impact on our Core Programs and Countries of Focus.

"Save a Child's Heart (SACH) and Gift of Life International (GOLI) have been collaborating to save the lives of children with heart disease in developing countries for the past 20 years. GOLI has assisted SACH in the funding of the treatment of children with heart disease from Uganda, El Salvador, Kosovo, Iraq and Syria at the Wolfson Medical Center (WMC) in Holon, Israel. We are excited to move our partnership to another level by partnering in Romania to develop a sustainable pediatric cardiac program and are proud to be a global partner of Gift of Life International."

Simon Fisher
Executive Director
Save a Child's Heart (SACH)

Working in collaboration with like-minded nonprofit organizations, healthcare professionals, corporations, Rotarians and celebrities allows us to impact more families and to heal more little hearts around the world.

ROTARY CLUBS AND

ROTARY DISTRICTS WORLDWIDE

Gift of Life is a Rotarian-based program which is largely supported through its global network of Rotary Clubs and Rotary Districts worldwide. Rotarians around the world are engaged in providing hope to children with heart disease who otherwise would perish. Through the collaboration of Rotarians around the world, sustainable pediatric cardiac programs are being developed in our Core Countries of Uganda, El Salvador and Jamaica. An astounding 2,199 children have been treated over the past seven years in these three countries. As a result of ongoing mentoring from expert vocational training teams, Ugandan, Salvadoran and Jamaican doctors and nurses have been empowered to care for children with heart disease in their country of birth.

Rotarian support has also allowed for our global network to impact the lives of 458 children awaiting cardiac treatment in our Countries of Focus: Haiti, the Philippines and Kosovo. Children in these countries lack access to medical care and rely solely on visiting medical teams for treatment during medical missions.

Since 2009, $7,490,529 has been raised through Rotary Foundation grants and various Rotary Clubs and Districts worldwide.

These funds have:

**IMPACTED** the lives of children treated and their families around the world,

**EMPOWERED** doctors and nurses through training visits to our Core Countries,

**Provided** hope to children in our Countries of Focus who have been treated during medical missions and placed on national cardiac waiting lists during screening missions,

Supported the development of **SUSTAINABLE** pediatric cardiac programs in our Core Countries through the acquisition of essential equipment, supplies, medication and catheterization devices,

Helped to **SUSTAIN** families through our nutritional assistance program following their child’s treatment.

SIGNATURE INITIATIVES

Gift of Life International believes that to truly IMPACT the life of a child with heart disease, we must not only heal their heart but also ensure for them a healthy future. Our Signature Initiatives help us achieve this goal.

AFTERCARE FOLLOW-UP is provided to each child treated in our Core Countries by affiliated NGOs to ensure continued health.

NUTRITIONAL ASSISTANCE programs in El Salvador, Uganda and Haiti help ensure each child treated receives proper nourishment to support recovery and healthy growth.

VOCATIONAL TRAINING programs offer parents of children who received operations, opportunities to increase their household income to support basic needs.

HUMANIZED CARE programs support parents, children and staff as they cope with the stresses of heart surgery. By providing optimal and compassionate care in the hospital setting, families will leave with an experience of competency and resilience.
EVOLVING OVER THE PAST 40 YEARS TO MAKE A GREATER IMPACT IN THE LIVES OF CHILDREN WITH HEART DISEASE AND THEIR FAMILIES

1975 First-ever GOL recipient received second chance at life

In 2003, GOL was formed with the following Guiding Principles:
- Develop new GOL programs
- Maximize the capacity of existing GOL programs to help children
- Develop partnerships with like-minded, non-governmental organizations
- Tell the collective story of GOL programs

In 2008, GOL global network celebrated saving our 10,000th Child

OVER 18,000 Children Treated
From 71 Countries Across 6 Continents

2009 Strategy created to focus on developing sustainable pediatric cardiac surgery, aftercare and catheterization programs in select countries

2015 Implemented unprecedented 7-in-7 global initiative to treat children with heart disease worldwide

7 Children Treated From 7 Continents in Just 7 Days
An 8th World Peace Child Was Also Treated

Our global network consists of 74 autonomous Gift of Life programs

MORE THAN 1,000 Children Treated Annually
Through our Global Network of Caring
INDEPENDENT ACCOUNTANTS' REVIEW REPORT

Board of Directors
Gift of Life International, Inc.
PO Box 650436
Fresh Meadows, NY 11365

We have reviewed the accompanying statement of financial position of Gift of Life International, Inc. (a not-for-profit corporation) as of June 30, 2014, and the related statements of activities, functional expenses, and cash flows for the year then ended. A review includes primarily applying analytical procedures to management's financial data and making inquiries of company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

Our responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance that there are no material modifications that should be made to the financial statements. We believe that the results of our procedures provide a reasonable basis for our report.

Based on our review, we are not aware of any material modifications that should be made to the accompanying June 30, 2014 financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.

The June 30, 2013 financial statements were audited by us, and we expressed an unmodified opinion on them in our report dated April 21, 2014. We have not performed any auditing procedures since that date.

THE IMPACT YOU HAVE MADE ON
1,000s OF CHILDREN AND THEIR FAMILIES
HAS CHANGED THEIR LIVES FOREVER...

OUR 2014 TOTAL IMPACT
$6,118,825

- Healing over 1,000 little hearts each year around the world
- Creation of sustainable pediatric cardiac programs in Uganda, El Salvador and Jamaica
- Empowerment of healthcare professionals to treat children in their country of birth
- Reduction of pediatric cardiac waiting lists globally
- Developed trust among partner governments, hospital administrations and pediatric cardiac programs

Contributions $498,525
Rotary Foundation Impact $1,551,625
In-Kind Revenue $4,068,675

IN ANY LANGUAGE, THE EMOTION IS THE SAME...
THE MEANING THE SAME...THE MESSAGE THE SAME...

IF WE HAVE HOPE WE HAVE A REASON TO BELIEVE...
TO BELIEVE THAT TOMORROW WILL BE BETTER...
AND THAT A CHILD’S HEART MAY BE HEALED...

THANKS TO YOU!
