Gift of Life International and its consortium of like-minded partners continue efforts to provide hope to Haitian children in need of cardiac interventions. Through our partnership with St. Damien Hospital, we are working to develop the first-ever healthcare facility in Haiti capable of treating children with heart disease. **We are the only consortium of charities currently in Haiti performing heart surgery either on children or adults.**

Pediatric Cardiac Surgeons, Dr. Francesco Santoro and Dr. Elena Ribera from Genoa, Italy led an international team of healthcare professionals as they worked together with Haitian doctors and nurses to heal 12 little hearts during the mission week. The wonderful aftercare team from Akron Children’s Hospital in Ohio ensured that each patient was recovered and discharged prior to their departure.

Dr. Jacqueline Gautier, CEO of St. Damien Hospital was delighted to witness the skills transfer between visiting and Haitian team members. Dr. Gautier was also very happy to watch Dr. Alexandra Noisette utilize her newly-acquired skills to diagnose and evaluate nearly 100 children during the mission week. Dr. Noisette returned from Martinique where she is being trained as the first-ever Haitian pediatric cardiologist to help the children in her own country.

We wish to extend a heartfelt thank you to the many volunteers from various partner organizations who traveled to Haiti to lend a helping hand and to witness first-hand 12 children’s lives being saved.

Lastly, our most sincere thanks to Rotary Foundation Cadre, John Judson for joining us in Haiti to experience the impact of Rotary and the many like-minded partners who are working together to make a difference in the lives of these precious Haitian children.
