Thank you to all Rotary Global Grant 1530587 contributors: Rotary Clubs of Makati West, Pisgah Forest, Red Bank, Stratford, Croton-on-Hudson, Asheville Breakfast, Rotary Districts 7500, 7670, 6890, 7255, Gift of Life Inc., Gift of Life of Western Carolina, Gift of Life Los Angeles, the Filipino-American Community of WNC and The Rotary Foundation.
ROTARIANS SERVING HUMANITY
Providing Hope to Filipino Children

The July 2016 Medical Mission to the Philippine Children's Medical Center marked the 6th of its kind in an effort to respond to the crisis which exists for Filipino children with heart disease. A total of 106 children have been treated through Rotary Global Grant partnerships since 2013. These 106 children and their families have been provided hope thanks to the efforts of the Rotary Club of Makati West, the Rotary Club of Pisgah Forest and their many global grant partners and healthcare professionals.

We are grateful to the visiting Hearts With Hope Foundation medical team, led by Dr. Juan Carlos Alejos, who made their first trip to Manila to heal these precious hearts. We sincerely appreciate your dedication and the love and care you provided to the children treated during this mission.

A special thank you to Rotarian Nancy Haddock from the Gift of Life Rotary District 7500 Foundation for traveling to Manila to share in this lifesaving experience. The wonderful partnership of Gift of Life 7500 has truly made an impact for many Filipino children and their families.

Our heartfelt thanks to the wonderful Makati West Rotarians for their on-going dedication to children with heart disease in their home country. We sincerely appreciate your impeccable coordination of all aspects of each mission from planning to government approvals to final execution. Your kind hospitality and attention to detail is second to none.

Thank you to all partners for healing 9 more little Filipino hearts during this week.
THANK YOU TO OUR VISITING TEAM

DR. RYAN DAVIES  
Cardiac Surgeon

DR. JUAN ALEJOS  
Pediatric Cardiologist

DR. RAMESH KODAVATIGANTI

A TRIBUTE TO A LITTLE FIGHTER

Five year old Julian underwent successful open heart surgery to repair a VSD during the July mission. He made a remarkable recovery and was in excellent health as observed during his post-operative follow up examination and visit. Sadly, three weeks later Julian developed a skin infection on his right thigh which traveled quickly through his blood stream and infected his recently repaired heart. Although he was treated aggressively with antibiotics, he succumbed to the infection and passed away 5 weeks after his heart was successfully repaired. Our thoughts and prayers will remain with the family forever.
