Thanks to all partners of Rotary Global Grant 2119940, a total of 69 Romanian children have had their hearts healed over the past 12 months. The Romanian pediatric cardiac team which is comprised of healthcare professionals from Cluj and Bucharest work in collaboration every other weekend at Grigore Alexandrescu Hospital in Bucharest to light the world with hope for Romanian children and their families. This project has exceeded the planned 56 surgeries thanks to the efficient use of supplies and medications purchased with grant funds as well as disposable contributions from the hospital. All surgeries have been completed with nearly a 100% success rate! Sadly, one child was not able to recover from their complex heart defects and passed away following surgery. The parents were grateful to the Romanian team for their efforts to save their child’s life. Together we celebrate the lives of the 68 children who now have hope for a healthy future.
